SAFETY QUIZ

ON FRIDAY

Need 80% to  
participate in labs

## DOUGHERTY VALLEY HIGH SCHOOL LABORATORY SAFETY CONTRACT

### HANDLING GLASSWARE & EQUIP.

39) Carry glass tubing, especially long pieces, in a vertical position to minimize the likelihood of breakage and injury.

40) Never handle broken glass with your bare hands. Use a brush and dustpan to clean up broken glass. Place broken or waste glassware in the designated glass disposal container.

41) Inserting and removing glass tubing from rubber stoppers can be dangerous. Always lubricate glassware (tubing, thistle tubes, thermometers, etc.) before attempting to insert it in a stopper. Always protect your hands with towels or cotton gloves when inserting glass tubing into, or removing it from, a rubber stopper. If a piece of glassware becomes "frozen" in a stopper, take it to your instructor for removal.

42) Fill wash bottles only with distilled water and use only as intended, e.g., rinsing glassware and equipment, or adding water to a container.

43) When removing an electrical plug from its socket, grasp the plug, not the electrical cord. Hands must be completely dry before touching an electrical switch, plug, or outlet.

44) Examine glassware before each use. Never use chipped or cracked glassware. Never use dirty glassware.

45) Report damaged electrical equipment immediately. Look for things such as frayed, exposed, or damaged wires, and loose or damaged electrical components.

51) Heated metals and glass remain very hot for a long time. They should be set aside to cool and picked up with caution. Use tongs or heat-protective gloves if necessary.

52) Never look into a container that is being heated.

53) Do not place hot apparatus directly on the laboratory desk. Always use an insulating pad. Allow plenty of time for hot apparatus to cool before touching it.

54) When bending glass, allow time for the glass to cool before further handling. Hot and cold glass have the same visual appearance. Determine if an object is hot by bringing the back of your hand close to it prior to grasping it.

### QUESTIONS

1) Do you wear contact lenses?  
☐ YES ☐ NO

2) Are you color blind?  
☐ YES ☐ NO

3) Do you have allergies?  
☐ YES ☐ NO

If yes, list specific allergies:  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

### AGREEMENT

I, \_\_\_\_\_  
(Student's name printed)  
have read and agree to follow all of the safety rules set forth in this contract. I realize that I must obey these rules to ensure my own safety, and that of my fellow students and instructors. I will cooperate to the fullest extent with my instructor and fellow students to maintain a safe lab environment. I will also closely follow the oral and written instructions provided by the instructor. I am aware that any violation of this safety contract that results in unsafe conduct in the laboratory or misbehavior on my part, may result in being removed from the laboratory, detention, receiving a failing grade, and/or dismissal from the course.

Student Signature \_\_\_\_\_  
Date \_\_\_\_\_

### Dear Parent/Guardian,

We feel that you should be informed regarding the school's effort to create and maintain a safe science classroom/laboratory environment.

With the cooperation of the instructor, parents, and students, a safety instruction program can eliminate, prevent, and correct possible hazards.

You should be aware of the safety instructions your son/daughter will receive before engaging in any laboratory work. Please read the list of safety rules above. No student will be permitted to perform laboratory activities unless this contract is signed by both the student and parent/guardian and is on file with the teacher.

Your signature on this contract indicates that you have read this Student Safety Contract, are aware of the measures taken to ensure the safety of your son/daughter in the science laboratory, and will instruct your son/daughter to uphold his/her agreement to follow these rules and procedures in the laboratory.

### Welcome to Mrs. Farmer's Chemistry Class!

[www.mychemistryclass.net](http://www.mychemistryclass.net)

I am very excited to start this school year and get to know all of you! The first week can be very hectic - programs don't always work, schedules change every day, tons of handouts from teachers, lockers to find, books to check out, etc. Hopefully this paper will help you keep track of all the "start of the year" type assignments for your Chemistry class. I will post due dates and daily homework on Schoology so make sure to check there every day!

The first table is a list of some "start of the year" assignments. These should be done by the Monday of the second week of school.

The back of this page will tell you how we will set up our spiral bound interactive notebooks. I will give you all needed school supplies but please try to get a non-graphing scientific calculator as soon as you can! If you are having any difficulties obtaining a calculator quickly please let me know so we can figure something out. You can find copies of worksheets and handouts on my class website: [www.mychemistryclass.net](http://www.mychemistryclass.net) hope your first week of school goes well, and let me know if you have any questions!

**Lab Safety Assignment - Read this paragraph and then start!**

In order to be able to participate in laboratory activities this year you will need to complete this assignment with at least 80% accuracy, as well as pass a lab safety quiz with at least 80% accuracy. If you do not complete this assignment given to you by Mrs. Farmer, then you will need to complete a remedial assignment given to you by Mrs. Farmer and then retake a new version of the safety quiz until you earn an 80% or higher. The Safety Quiz will be given on the second Friday of the school year - the end of the second week.

Your email will be recorded when you submit this form.

<b>Lab Safety Assignment</b> I am very excited to start this school year and get to know all of you! The first week can be very hectic - programs don't always work, schedules change every day, lots of handouts from teachers, books to find, books to check out, etc. Hopefully this paper will help you keep track of all the "start of the year" type assignments for this class. I will post due dates and daily homework on Schoology so make sure to check there every day!	<b>Some New Phone Apps to Get</b> I have a list of some new phone apps that I think you should have. Please bring this to class on the first day of school.

**Lab Safety Assignment - Read this paragraph and then start!**

In order to be able to participate in laboratory activities this year you will need to complete this assignment with at least 80% accuracy, as well as pass a lab safety quiz with at least 80% accuracy. If you do not complete this assignment with 80% accuracy then you will need to complete a remedial assignment given to you by Mrs. Farmer. If you do not earn an 80% or higher on your safety quiz then you will need to complete a remedial assignment given to you by Mrs. Farmer and then retake a new version of the safety quiz until you earn an 80% or higher. The Safety Quiz will be given on the second Friday of the school year - the end of the second week.

Your email will be recorded when you submit this form.

DUE 8:00am

FRIDAY NEXT WEEK!

Don't need printed or signed.

Completing Google Doc  
counts as signature.

Need 80% to  
participate in labs

**Welcome to Mrs. Farmer's Honors Chemistry Class!**  
www.mychemistryclass.net

I am very excited to start this school year and get to know all of you! The first week can be very hectic - programs don't always work, schedules change every day, tons of handouts from teachers, lockers to find, books to check out, etc. Hopefully this paper will help you keep track of all the "start of the year" type assignments for this class.

**I will post due dates and daily homework on Schoology so make sure to check there every day!**

The first table is a list of some "start of the year" assignments. **These are due by Friday of the 2nd week of school.** The second table is a summary of what you can find on the class website, and where to find it.

The back of this page will tell you how to set up your 3-ring binder and composition notebooks. Please try to get the supplies mentioned as soon as possible! If you are having any difficulties obtaining the supplies quickly please let me know so we can figure something out. You can find copies of worksheets and handouts on my class website: [www.mychemistryclass.net](http://www.mychemistryclass.net) I hope your first week of school goes well, and let me know if you have any questions!

**DOUGHERTY VALLEY HIGH SCHOOL**  
**LABORATORY SAFETY CONTRACT**

**HANDLING GLASSWARE & EQUIP.**

39) Carry glass tubing, especially long pieces, in a vertical position to minimize the likelihood of breakage and injury.

40) Never handle broken glass with your bare hands. Use a brush and dustpan to clean up broken glass. Place broken or waste glassware in the designated glass disposal container.

41) Inserting and removing glass tubing from rubber stoppers can be dangerous. Always lubricate glassware (tubing, distill tubes, thermometers, etc.) before attempting to insert it in a stopper. Always protect your hands with towels or cotton gloves when inserting glass tubing into, or removing it from, a rubber stopper. If a piece of glassware becomes "frozen" in a stopper, take it to your instructor for removal.

42) Fill wash bottles only with distilled water and use only as intended, e.g., rinsing glassware and equipment, or adding water to a container.

43) When removing an electrical plug from its socket, grasp the plug, not the electrical cord. Hands must be completely dry before touching an electrical switch, plug, or outlet.

44) Examine glassware before each use. Never use chipped or cracked glassware. Never use dirty glassware.

45) Report damaged electrical equipment immediately. Look for things such as frayed cords, exposed wires, and loose connections. Report damaged electrical equipment immediately.

51) Heated metals and glass remain very hot for a long time. They should be set aside to cool and picked up with caution. Use tongs or heat-protective gloves if necessary.

52) Never look into a container that is being heated.

53) Do not place hot apparatus directly on the laboratory desk. Always use an insulating pad. Allow plenty of time for hot apparatus to cool before touching it.

54) When handling glass, allow time for the glass to cool before further handling. Hot and cold glass have the same visual appearance. Determine if an object is hot by bringing the back of your hand close to it prior to grasping it.

**QUESTIONS**

1) Do you wear contact lenses?  
☐ YES ☐ NO

2) Are you color blind?  
☐ YES ☐ NO

3) Do you have allergies?  
☐ YES ☐ NO  
If yes, list specific allergies: \_\_\_\_\_

**DEAR PARENT/GUARDIAN,**

We feel that you should be informed regarding the school's effort to create and maintain a safe science classroom/laboratory environment.

With the cooperation of the instructors, parents, and students, a safety instruction program can eliminate, prevent, and correct possible hazards.

You should be aware of the safety instructions your son/daughter will receive before engaging in any laboratory work. No student will be permitted to perform laboratory activities unless this contract is signed by both the student and parent/guardian and is on file with the instructor.

Your signature on this contract indicates that you have read this Student Safety Contract, are aware of the measures taken to ensure the safety of your son/daughter in the science laboratory, and will instruct your son/daughter to uphold his/her agreement to follow these rules and procedures in the laboratory.

Parent/Guardian Signature \_\_\_\_\_

**AGREEMENT**

I, \_\_\_\_\_

(student's name printed)

have read and agree to follow all of the safety rules set forth in this contract. I realize that I must obey these rules to ensure my own safety, and that of my fellow students and instructors. I will cooperate to the fullest extent with my instructor and fellow students to maintain a safe lab environment. I will also closely follow the oral and written instructions provided by the instructor. I am aware that any violation of this safety contract that results in unsafe conduct in the laboratory or misbehavior on my part, may result in being removed from the laboratory, detention, receiving a failing grade, and/or dismissal from the course.
