

# Classification of Matter Graphic Organizer

- I provided you with a graphic organizer (flow chart) that I made in order to help figure out how to "classify" matter into different groups (mixtures, pure substances, compounds, elements, etc).
- You need to process the information given to you during lecture, and on the "Classification of Matter" graphic organizer I made you
  - To process you are going to make your OWN graphic organizer
  - YOU CANNOT COPY MINE!
  - Must include the following classifications:
    - Matter
    - Mixtures
      - Homogeneous mixture
      - Heterogeneous mixture
    - Pure Substances
    - Compounds
    - Atoms
  - You must include a PICTURE of each classification above
  - There must be some kind of logical organization or connection of them.
- Four Colors
- All classifications listed above
- Picture of each classification
- EFFORT!
- **CREATIVITY!** DONT COPY MY GRAPHIC ORGANIZER! You can google the phrase "graphic organizers" and get all sorts of ideas!
