

Free Choice Processing Assignment

- Use the ideas in the front of your notebook, or come up with your own creative idea!
- You can do lots of little processing ideas, or one big one.
- Spend a full 15 minutes on it. Not “15 minutes” while you play a game on your phone, watch TV, post to Instagram, etc...do an actual 15 minutes of work please!
- If you do a writing style processing idea this time, then do a visual one next time.
- Include a minimum of three different colors added to your work – yes, even if writing! If writing, you could color key words, add diagrams, etc.
- Your free choice processing needs to relate back to the topic/content being covered in a DETAILED and MEANINGFUL way! You can't just draw a picture of an atom and be done!
- Remember...this is in place of me giving you a formal worksheet, or a written essay, or a quiz, etc. Take it seriously! If I can see how much you know from this assignment then I may not have to give you a quiz on it! (no promises though – ha!)
