

Matter Haikus

- Write THREE separate Haikus
 - One about Elements
 - One about Compounds
 - One about Mixtures
- They need to include chemistry information that you know about each one!
- See p. 9 in your notebook for instructions on how to write a haiku if you don't remember.
- Each Haiku needs a picture/drawing/image to go with it. This needs to be more involved than simply typing the word "element" into google images and printing a picture. If you print a picture you must have "your hand" in it somehow – meaning you must do something to make it "yours."
