

Evidence of 30 minutes of Self Review

- Use the “Resources” tab on the class website www.mychemistryclass.net
- You must show evidence that you studied for 30 minutes – this is not the same as just writing a list of things you claim you have done!
 - Don't write “I did a worksheet” –
INSTEAD...show your work for the problems you did!
 - Don't write “I watched a YouTube video” –
INSTEAD...write down the link for the video and take notes on what the video covered.
 - Don't write “I reviewed my notes” –
INSTEAD...jot down key information from your notes as you review them.
 - Don't write “I studied with my friends” –
INSTEAD...record the things you did with your friends while studying (practice problems, questions you asked each other, etc)
 - Don't write “I worked with a tutor” –
INSTEAD...you should actually be doing something with your tutor that you can record! Practice problems, notes on things they explain, etc.
 - Etc...etc...etc...
- Make sure you CLEARLY LABEL what you are doing/showing me.
- You are trying to PROVE that you did 30 minutes (minimum!) of self-studying, not just a list of things you claim you did.
