

AP Chemistry Project – Peer Feedback Form

Directions: Complete the following review sheet for the projects you attempt during class.
 Circle the appropriate numbers and provide 3 pieces of constructive feedback.
 Use the following rubric to determine which number to circle.

5	Well above grade level/standard. Truly exemplary work going above and beyond expectations. The instructor could use this as is next year.
4	Above average grade level/standard output. A good effort has been given. The instructor could use this next year with very few changes.
3	At grade level/standard. Standards have been met at minimum capacity. The instructor has a good idea to work with of but will need to make some decent changes.
2	Slightly below grade level/standard expectations. A stronger effort or remedial efforts and instruction may be needed. The instructor would need to rework most of this in order to use it next year.
1	Well below grade level/standard expectations. Low effort has been given, or remedial instruction is needed. This is not a viable activity or idea for the instructor to use next year.

Topic of Project					
Name of Project					
Connection to Assigned Topic	5	4	3	2	1
Clarity of Project Instructions	5	4	3	2	1
Ease of Completion/ Playing of Project	5	4	3	2	1
Overall Impression of the Project	5	4	3	2	1
One area/thing/ aspect I truly enjoyed about the Project was:					
Two Possible areas of improvement are:
