Dougherty Valley HS Chemistry Chapter #7 – Review Topics and One Pager

This is a general list of some of the topics we have covered this chapter. These are suggested study topics, not a definitive list. You can/will be assessed on not just whether you have memorized the material, but also if you can apply the information to a new scenario/situation/context/example. Remember – there is a difference between “knowing” something and truly “understanding” something – memorization vs applying!

- Calculating Molar Mass
- Mole Ratios
- Real Life Stoichiometry Problems
- Molar Conversions
- Stoichiometry Problems
- Yields

One Pager Instructions

A one-pager is a written and graphic interpretation of what you’ve learned presented on a single sheet of paper. In this case, you will demonstrate that you have successfully practiced strategies commonly used by effective learners. The one-pager will help showcase your thoughts and will provide a reference for later review or further study of the topics.

Guidelines:

- Fill the entire paper - minimize the white space in a meaningful way!
- Include all required information (arrange it on page any way you choose).
- Needs to show a high level of effort, detail, thought, and care. This is not something you scribble out during brunch before class starts!
- Must represent all topics from chapter.
- Must show higher level THINKING and PROCESSING of the information, not just regurgitating every fact you learned.
- Must be clear, easy to read, understandable
- Writing must be in ink, no pencil.
- Use color for illustrations.

Required Information – MUST LABEL SECTIONS AND USE BOXES TO SEPARATE SECTIONS

- | | |
|---|---|
| <input type="checkbox"/> Chapter number and title
<input type="checkbox"/> Five most important vocabulary words/terms
<input type="checkbox"/> Key equations (with names of equations if applicable).
<input type="checkbox"/> List of key big concepts/topics (not vocab words)
<input type="checkbox"/> Explanations of words or ideas that correspond to the chapter
<input type="checkbox"/> A “warning” or “tips” section | <input type="checkbox"/> Visual representations of the important aspects of the chapter
<input type="checkbox"/> Two higher level questions about the concepts INCLUDING answers. These are not <i>calculations</i> to solve.
<input type="checkbox"/> Two annotated/explained “representative practice problems” for any topics related to math. Needs to be more than just listing the steps – that isn’t explaining anything! If no math in the chapter then does not need to be included. |
