

Dougherty Valley HS Chemistry
Spring Final Exam Review
2nd Semester Topic and Representative Question Identification

S-40

Name:

Period:

Seat#:

You will use this worksheet to help record a summary of the major topics/ideas/facts for each chapter. Once you have spent some time in class remembering the main topics/ideas/facts for each chapter you will spend some time looking through your old worksheets to try and identify “representative questions” for each chapter – if your teacher could pick only a couple questions from each chapter to put on the final exam, which ones would your teacher pick? It is impossible to cover every single tiny bit of content on a final, so which questions from the year would assess if a student learned the most important aspects of the course?

- Participate in the class poster making activity.
- Use this worksheet during the “gallery walk” to capture the information on the posters.
 - If you would like more space, you are welcome to use extra paper and staple it to this worksheet!
- Go through your old rainbow packets and identify questions on each worksheet that you think your teacher would consider putting on the final exam.
 - Identify it by worksheet # and question #
- In class your teacher will show you the list they picked.
- Determine if you identified the same exact questions, similar questions, or if you were totally off the mark.
- You do not have to do these practice problems again unless you feel like it would be a good use of your self-study time.

Chapter 10
Thermochemistry

Chapter 9
Gas Laws
